# About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Our company is dedicated to pension fund management; therefore, it plays a key role in the economy due to the substantial amount of assets it manages and the fiduciary commitment over the invested assets. According to the conditions of the local market, our organization has the potential to positively impact the real economy, demanding specific guidelines and promoting the incorporation of sustainability best practices.

At a regional level, our organization has made significant strides in responsible investment, aiming for regional alignment to achieve more efficient progress. While at the national level, efforts have begun with the establishment of public-private partnership forums and some specific sustainability initiatives, there are still many regulatory and business challenges.

The role our entity plays in the securities market is crucial for understanding the responsibility and commitment we must assume in order to incorporate ESG principles into it. The requirements we are seeking represent the starting point for both corporations looking to issue in the securities market and alternative investments, to understand the need to incorporate ESG requirements in order to become eligible assets.

In line with this, our goal is to be agents of change towards a sustainable economy in the long term, aiming to align traditional investment with sustainable investment. For this reason, we have been pioneers in the market by issuing an open letter, outlining the focus of analysis that our investments will have as a way to achieve a supported transition process, while demanding necessary transparency through the creation of annual reports using internationally recognized standards such as the GRI and SASB Standards. We strengthen the quality of ESG information disclosure, develop internal and/or external audit processes that ensure transparency and reliability, and carry out analyses on climate change, among other initiatives.

Our sustainability policy serves as a framework that allows us to identify and quantify sustainable investment. We have created and use a taxonomy that objectively and comparably classifies investments, actively managing them and making long-term impactful decisions. As a company, we have committed to the Climate Change Declaration for Latin America, which seeks to unify efforts to become carbon neutral. We collaborate with all Latam signatories to develop the necessary capabilities and methodologies to measure the climate impact and alignment with local and global climate objectives.

We are members of PCAF, a global partnership of financial institutions working together to develop and implement a harmonized approach to assess and disclose greenhouse gas emissions associated with their loans and investments. This enables us, among other things, to measure the carbon footprint of our portfolio.

Our progress in this area, as well as our participation in PRI, aligns with our commitment to sustainable investment. It is an essential element of our mission and business principles. Through investment management processes, we aim to contribute to sustainability and to the building of a better society.

#### Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
  - refinement of ESG analysis and incorporation
  - stewardship activities with investees and/or with policymakers
  - collaborative engagements
  - attainment of responsible investment certifications and/or awards

At AFAP SURA, we understand that sustainable investment is also a competitiveness strategy, a way to generate value and leverage growth and solidity by applying environmental, social, and corporate governance (ESG) sustainability criteria in a serious and rigorous manner.

In line with this, the growing awareness at a general level regarding the need for development in sustainable investments has allowed us to progress in training our staff. We have formed a specialized local ESG team that addresses all related topics, as well as regional synergies through a dedicated regional team. This has led to the development of knowledge, monitoring, and a strong annual work plan. The work plan for the past year primarily focused on identifying and categorizing our portfolio investments, initiating the process of measuring the portfolio's carbon footprint, creating specific ESG rating systems for asset classes, and engaging with companies. We consider the engagement aspect of utmost relevance in the market we operate in, as active commitments with issuers align our investments with sustainability while positively and directly impacting the real economy.

Our efforts for the upcoming years continue to concentrate on generating engagement commitments, decarbonizing the portfolio, measuring climate change impact risks, and providing continuous training for the team responsible for analyzing sustainability factors. In line with our commitment, we have undertaken work through the National Association of AFAP in Uruguay (ANAFAP) (a union that brings together private Pension Fund Administrators in the country) on Sustainable Investment in pension funds. This effort involves an analysis that aims to highlight the importance of incorporating sustainability analysis into pension funds. It is based on analyses from other regions such as Latin America, Europe, and the USA. The analysis was presented this year to various market stakeholders (regulators, AFAPs, investors, trustees, etc.) and was approached from an international experience perspective, considering the Environmental, Social, and Governance (ESG) factors in risk analysis and investment portfolios. The objective is to raise awareness about the significance of this topic and the need for transparency and regulation within Uruguay's context.

### Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

In the coming years, we will advance in the development of sustainable investment, placing the main focus on the guidelines we have acquired through our adherence to PRI. Our efforts for the forthcoming years continue to center around generating engagement commitments, decarbonizing the portfolio, measuring climate change impact risks, and providing ongoing training for the team responsible for analyzing sustainability factors.

At the local level, our focus is on having a greater presence in the securities market, demanding higher requirements concerning ESG matters, in alignment with advancements in engagement processes. Additionally, our contribution to the regulator for the development of sustainable investment regulations that align with the market is relevant to us.

### Describe how your organisation incorporates ESG factors into the following asset classes.

#### Internally managed (A) Forestry

In relation to these assets, our main focus is engagement. To carry this out, we design an ESG due diligence questionnaire that allows us to gather information about the issuer and the specific structure in which we invest. This process also helps us generate a baseline of comparable metrics by sector and, in the future, measure their evolution over time. This due diligence serves as the primary input for our internally developed ESG rating system.

The ESG rating system, based on international standards such as SASB and TCFD, is sector-specific and evaluates both qualitative and quantitative criteria of the issuer and the invested structure. Once the ESG rating is determined, it affects the allocated investment quota. Our investments are categorized according to an internally established regional taxonomy, enabling us to clearly identify when we are dealing with a sustainable investment or similar categories.

Each investment is analyzed prior to issuance and regularly monitored through qualitative ESG criteria. During each analysis, related certifications are identified, environmental and social reports are reviewed, periodic meetings with involved stakeholders are conducted, and engagement agreements are established to promote greater adoption of sustainable criteria in each investment.

#### (C) Other

In relation to these assets, we have a specific ESG rating system for sovereigns and sustainable bonds. In this system, we take into account quantitative variables, which are compared based on a specific set of countries, in order to assign an objective rating. This rating allows us to understand how advanced the country is in terms of sustainability, as well as the key challenges it faces. Once this rating is obtained, it influences the investment approval process, along with a recommended interest rate.

**Does your formal responsible investment policy(ies) identify a link between your responsible investment activities and your fiduciary duties or equivalent obligations?**

- (A) Yes

Elaborate:

As a Pension Fund we frame sustainable development with a long-term perspective, considering both financial aspects and Environmental, Social, and Corporate Governance ('ESG') factors in how we conduct our business. Our corporate purpose involves managing investment portfolios on behalf of our affiliates, with whom we maintain a fiduciary duty to seek the best return on their resources, at a reasonable risk level, under standards of excellence and industry best practices.

We recognize that the financial performance, business development, and value generation of the companies, projects, and structures in which the funds we manage are invested can be impacted, both positively and negatively, by their behavior in ESG variables. Potential opportunities and risks can arise from the good or poor management of these variables, thus influencing the fulfillment of the mentioned fiduciary duty. As such, they must be appropriately assessed in the investment decisions made within our Investment processes. To that extent, being mindful of the specific challenges associated with the investment processes and styles across different asset classes and businesses, we commit to incorporating ESG criteria in the assessment of investment opportunities, whenever the nature of the business and the market allow for it. This commitment takes into account the inherent nature of each industry concerning these criteria.
